NEW

Calacatta Glory
CS-501

Calacatta Glory features a design that exudes elegance and sophistication, characterized by a clean white base with naturally flowing warm gray veins. Its bold yet harmonious pattern adds depth and refinement to any space, seamlessly blending with both classic and contemporary interior styles. Calacatta Glory is highly versatile, making it an ideal choice for a wide range of designs, from modern minimalism to timeless classical interiors.

NEW

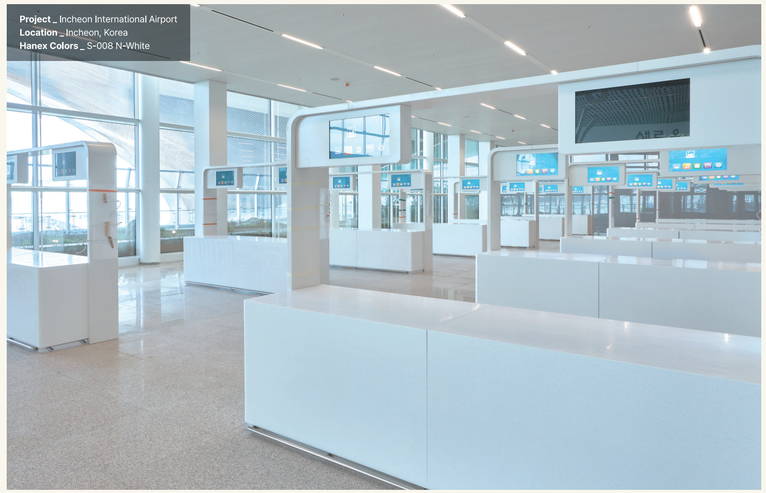

Black Desert
CS-502

Black Desert features a striking marble design with a bold base elegantly contrasted by flowing white veins, creating a sophisticated and luxurious ambiance.
The contrasting colors provide a dramatic visual effect while enhancing the overall refinement of the space.
It pairs exceptionally well with minimalist and industrial design styles, making it an ideal choice not only for kitchen countertops and island but also for high-end hotels. restaurants, and bars, where it adds an air of elegance and prestige.

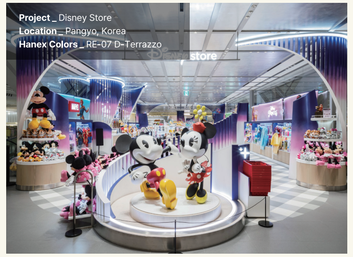

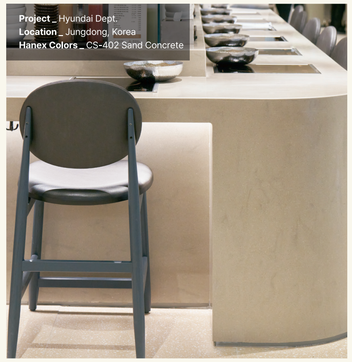

Reference

NEW

Misty White
CS-401

A sophisticated blend of soft white and gray tones creates a beautifully layered pattern, evoking a sense of calm and serenity.

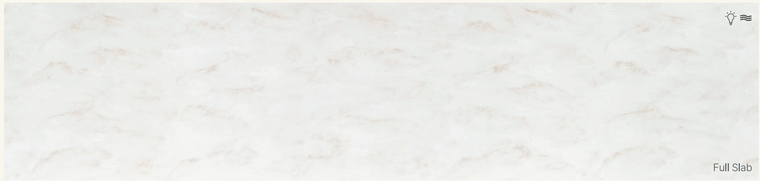

NEW

Linen White
BL-302

Linen White, with its inherent elegance and depth, adds a touch of sophistication to any space, creating a delicate statement of refined taste and living.

NEW

Sand Concrete
CS-402

Featuring a vintage sand-colored base infused with the raw texture of concrete, this design captures the essence of industrial aesthetics.

BACKLIGHTING
Certain colors have a higher level of translucency when exposed to light sources.

VEIN
Veined patterns inspired by nature are extremely sophisticated. It is desired to consult with our technician for better use.

RECYCLED CONTENT
The composition included substantial amount of recycled resources.
Please refer to the catalogue for more details.

Thermoforming Tech

Hanex introduces N-White Thermoforming Tech, a breakthrough in material engineering.
This innovative product boasts an elevated thermoplastic content, setting a new standard for flexibility and precision in design. With the ability to fold completely to a minimum radius of 0mm, it redefines the possibilities of molding intricate curves and organic shapes. Ideal for architectural structures and furniture manufacturing, Thermoforming Tech allows designers to achieve seamless, flowing forms without compromise. Whether it's for bold, dramatic molding or delicate, intricate details, this product empowers limitless creativity. Experience the next evolution in design with N-White Thermoforming Tech.

Recycled Content

At Hyundai L&C, sustainability is at the core of our innovation.
Our products integrate substantial recycled materials, contributing to a circular economy while minimizing environmental impact. By utilizing a high mineral content, we significantly reduce acrylic usage, ensuring a greener production process. Incorporating recycled chips allows us to meet SCS standards, while maintaining superior quality.

GREENGUARD GOLD

Hanex ensures superior indoor air quality with ultra-low VOC emissions and holds the GREENGUARD Gold Certification
*Fully compliant with U.S. Environmental Protection Agency (EPA) standards.

NSF51

Engineered for health and hygiene, Hanex is FDA-certified as a food-safe surface, safe for direct food contact in both residential and commercial settings.

U.S. GREEN BUILDING COUNCIL MEMBER

Incorporating Hanex into your projects can contribute points toward LEED v4.1 BD+C and ID+C certification, supporting sustainable, environmentally responsible building through the USGBC.
